

# Lynkwell EV Charger Transition Program

## Migrate to Resilience

Lynkwell's comprehensive e-mobility solution platform allows existing site hosts to migrate their network and expand their charging capabilities with ease. Transition to a more resilient solution with a single partner who can provide everything you need today and evolve with you into the future.

- Migrate any commercial EV charger immediately to our industry-leading network for free
- Enjoy the first year of the Lynkwell software subscription for free
- Qualify for extended warranty coverage under the Lynkwell Insure™ program
- Qualify for Level 2 station upgrade to the XLink™ with the Lynkwell Lifetime Warranty

**TOP  
9**

**Largest  
L2 & DCFC  
Network in  
USA**

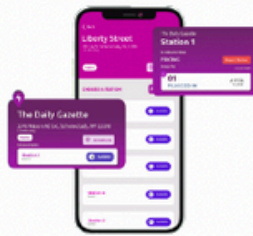

According to  
AFDC 2024

## One Partner - Total Solution

Access everything needed to migrate your network with a single partner, plus tap into industry-leading technology that evolves with you.

**Curated Hardware Catalog**

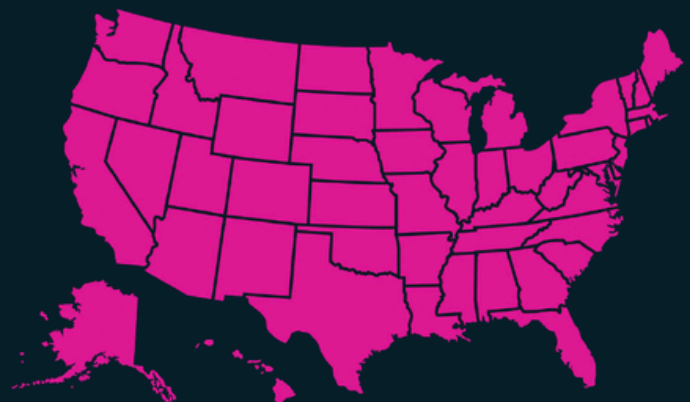

**Preferred Driver App**

**Performance Software Platform**

## All U.S. Team

Lynkwell's entire engineering, manufacturing, operations, support, and service teams are proudly co-located together in the USA.

### Why Upgrade Your Hardware?

- Improve reliability and uptime performance
- Ensure interoperability with software
- Protect with extended warranty coverage
- Transition quickly with fast installation

### XLynk™ L2 EV Charger

#### Designed for Uptime, Built for a Lifetime

- Ideal for public, private, or fleet charging
- First and only commercial EV charger with a Lifetime Warranty
- EZ-Swap Faceplate™ allows for customization, upgrading, or maintenance in under 5 minutes
- Proven reliability with total uptime coverage
- Manufactured in the USA with globally sourced parts

### Why Choose Lynkwell?

- Extensive experience transitioning both Level 2 and DCFC chargers to our network.
- Lynkwell has established partnerships and proven interoperability with many of the world's leading EV charging OEMs.
- Established partnerships with global roaming partners to provide exponential access to connect drivers with stations.
- Lynkwell software is OCPP 2.0.1 certified and is the preferred vendor of several leading global OEMs to validate OCPP on their hardware.
- Lynkwell has a curated catalog of over 500 products from the best OEMs from around the world plus our own XLynk™ Level 2 charger.
- If chargers were purchased via incentives, Lynkwell will maintain the reporting.
