

Lynkwell X-Change™

Lynkwell X-Change™ is the most comprehensive suite of energy management solutions, combining Lynkwell's proprietary offerings with curated partners from around the world.

Access · Expertise · Accountability
From an all US-based team

Offerings included in Lynkwell X-Change™:

- Hardware
- Software
- Distribution
- Installation
- Service
- Support

**Over 100
partners across
the U.S. and
growing!**

Any Stakeholder – Every Solution:

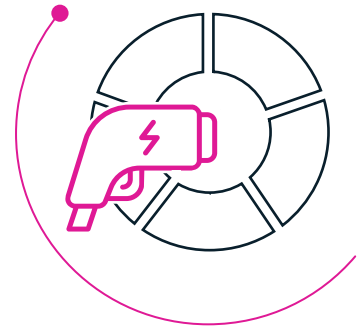

OEMs become validated partners, making their solutions easily accessible for customers

Installers have a single source for everything they need to execute a successful project

Site Hosts & Fleet Operators have a complete ecosystem of hardware, software, and services—all through a single, trusted, US-based partner

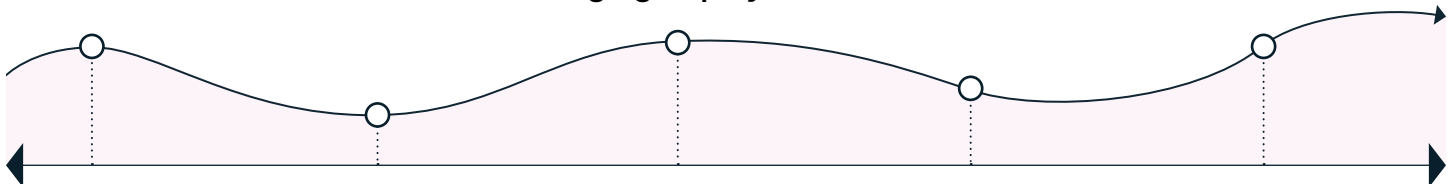

**Plug into everything
you need to
complete a project**

Access one thing or everything – Lynkwell has you covered

Lynkwell can provide full deployment for an EV charging project leveraging its X-Change ecosystem but is also happy to provide that same access to its comprehensive platform of products and services to others in the value chain as well.

EV Charging Deployment Process

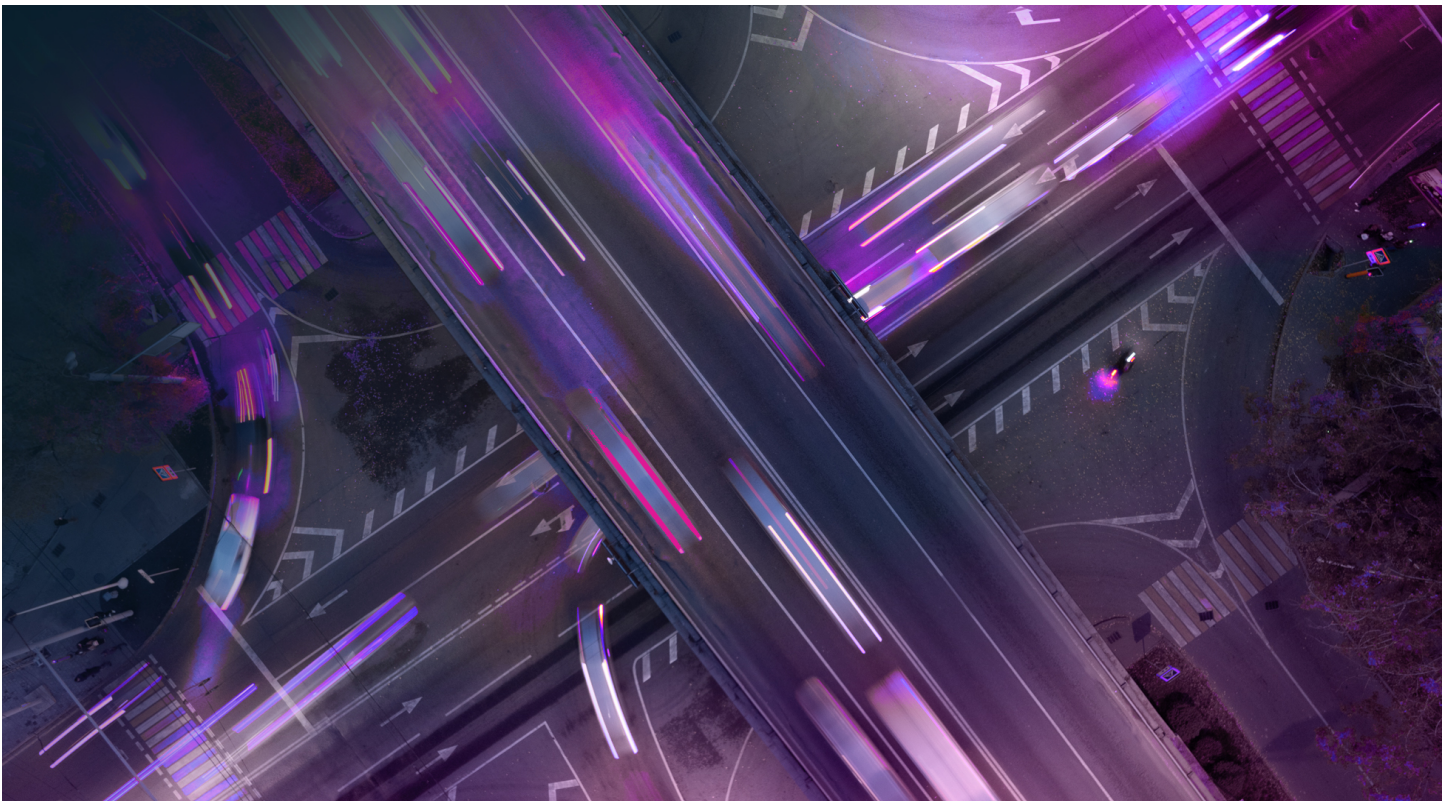

Lynkwell Supports You Every Step of the Way

What urgent problems does Lynkwell X-Change™ solve?

- Stakeholders often have to cobble products together from various providers to complete a project
- These disjointed products are not validated to work together prior to being used in real deployments
- Stakeholders may not have the knowledge to select the proper solution for their project
- Providers who only sell limited options are not equipped to provide the best, non-biased solution for each project
- With disjointed products, installers and site hosts have to triangulate multiple providers to get information
- If installers and site hosts have an issue, each disjointed provider points the finger at someone else

Having a single point of contact for access to the best solutions from around the world, proven expertise, and accountability with a trusted partner provides the best outcomes for all stakeholders.

A successful project is so much more than hardware and software

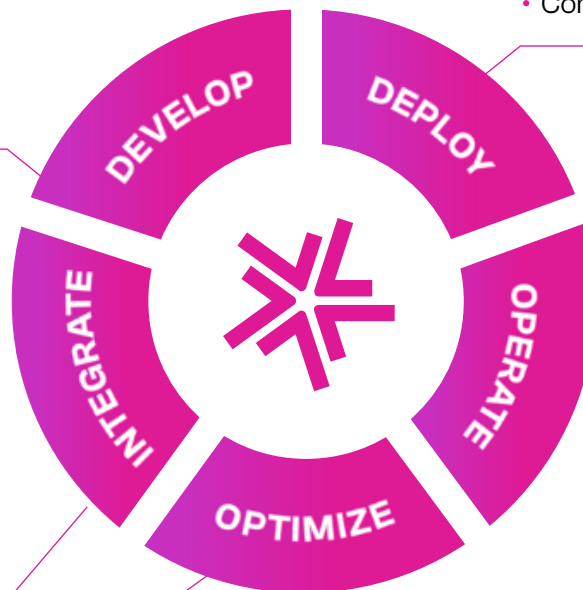

You can't have success without access to everything below.

Planning and Funding the Future Site

- Site Design & Engineering
- Equipment selection
- Funding options
- Software environments

Integration for Impact
