Why Work With Us

Livingston Energy Group

National Turnkey EV Charging Solutions

Livingston Energy Group, a Lynkwell company has been a full turnkey solutions provider since 2016 and facilitated the construction of over 7,000 charging stations both active and in development on its network. Ranked as one of the fastest-growing private companies, Livingston offers a full suite of services and equipment across North America for the installation and management of electric vehicle (EV) charging stations and the associated infrastructure. These solutions are built to support facility managers, utilities, municipalities, commercial properties, fleet managers and federal agencies in establishing private and public charging solutions. Livingston boasts one of the largest hardware catalogs in the industry with over 500 charging solutions ranging from Level 2 (AC) to Level 3 (DC). This catalog is built to ensure that the varying needs of the growing electric

transportation industry can be met with the correct infrastructure for each site and client need. Livingston made a mission to change the game by creating a versatile, full scope resource for clients and partners throughout the country. Through our comprehensive suite of integrated solutions, our team has deployed thousands of reliable and accessible charging stations on an industry leading network allowing access and customization for all.

Livingston has been vetted and approved for incentives, grants and tax credits across the United States including awards from federal, state and local governments and utilities. With a team of specialists, you can be assured that your project is designed to bring maximum value to your organization by leveraging these programs.

Coverage From Coast to Coast

Our network of certified installers & partners are powered by our 100% US-based support team to provide unbeatable service from US and CA.

Complete Solutions

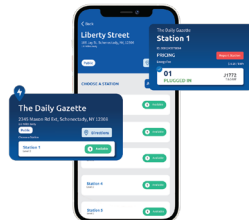

Everything You Need for a Successful Deployment

We provide a wide variety of solutions for you to get started and maintain a positive EV charging experience.

Charging Hardware

With over 500 product options available, you can be assured that we have the perfect solution for each of your locations and needs.

Driver Application

Our highly ranked app includes contactless payment, charging station locator, and remote start options. Includes 24/7 customer support.

Management Dashboard

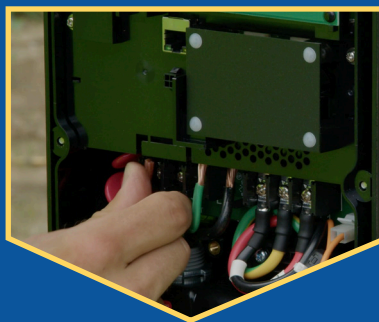

Driver and station data insights let you control, monitor and update advanced settings in real time. This system has been built to meet government reporting requirements.

Always Here For You

Service

Our team of professionals will help you navigate site design options, utility connections, equipment selection, funding sources, procurement requirements, and installation management for your deployment.

Maintenance

Station and network management solutions that provide for performance tracking, monitoring, remote troubleshooting, on-site response, warranty tracking, maintenance scheduling, and more while providing station owner and driver customer support.

Customer Support

We are here to answer any questions or concerns you have with 24/7 support with a technician at our Livingston location. Feel free to call the support number provided on the stations themselves, or report a problem through your app.

End-To-End Expertise

TOP 10

Largest EV Charging Network

According to 2022 Jeffries Auto Tech & Connected Mobility listing.

"Adding Livingston Charge Port™ EV charging stations to our city has helped us differentiate ourselves from other municipalities with a truly modern and relevant amenity for our community. The team at Livingston Energy Group really made the whole process of planning, installing, and managing the stations simple. Furthermore, their solution has far exceeded our expectations in better preparing the city for current and future challenges in transportation, planning, and strategies for using the stations as a tool for residents, visitors, the city fleet, and even local businesses."

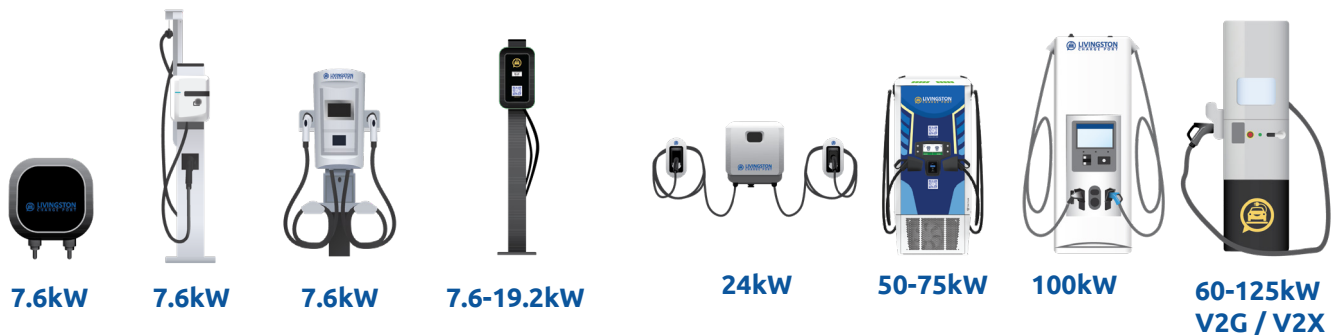

-Gary McCarthy, Mayor of the City of Schenectady

EV Charging Hardware

A Catalog of Over 500 Products and Growing

One of the industry's largest and most comprehensive catalogs, here are just a few of our standout 2022 best sellers. Each product can be tailored to your needs.

Service Advantage

Our Exceptional Service Team

Taking Care of Your Projects with Decades of Experience

Our service team is here to consult and facilitate your project every step of the way, including design, installation, and ongoing services, including support and maintenance.

Consultation and Site Design

We work with you to plan your project based on your site needs. Coordinating with the utility and municipality, we utilize our experience to maximize cost saving efforts in your site design.

Installation

With thousands of successful installations under our belt, we bring you project management, electrical and construction experts to ensure your job gets done right.

Service and Maintenance

We provide service, maintenance, and warranty coverage to ensure your stations are working so you don't have to.

Live Support

Real-time station monitoring and automated alerts are standard for our network operations, allowing us to provide immediate support, including initiation of service responses and deployment of maintenance personnel. Additional and extended warranty support, including unit replacements, may be available, so ask how we can provide you with the ultimate level of protection.

Three-Tiered service program provides choice in extended coverage for site hosts and drivers

- Tier 1** Phone support for drivers and site hosts.
- Tier 2** Advanced technical support on hardware and software.
- Tier 3** Offering various levels of site and warranty support.

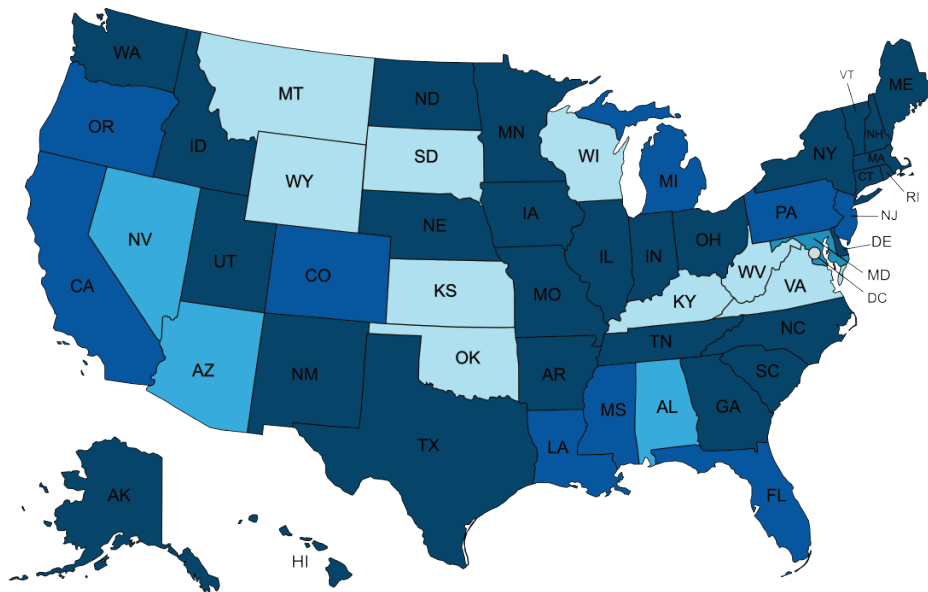

Qualified for Funding

Leveraging Federal, State and Utility Programs

Purchasing Made Simple and Affordable

Your projects can get funding and our team of professionals are here to help identify opportunities to reduce project costs. All qualifying equipment is preapproved and registered in incentive programs across over 1,700 utilities and agencies in the United States.

Project Management

Your Project Evolution

We offer beginning to end assistance with managing your project and connect you with our qualified installers to deliver on your project.

Consultation

Meet with our team virtually to review your site and develop a plan to meet your charging needs.

Proposal

We will prepare an estimate based on your site design and proposal. We will ensure that your location qualifies for any utility funding and incentives to reduce your financial liability.

Planning

Once you sign off on the estimate, we will coordinate a zoning evaluation to review your site in-person and ensure that there will be no logistical complications.

Approval

Our team will ensure all the installation permitting is secured before we break ground. Your utility provider will be notified, and all funding provided for the installation will also be secured at this point.

Installation & Activation

Once we have funding secured, our team will begin the installation process. As your total turnkey provider, we will handle the project management and make sure that your stations are built to last.

Get on the Map

Our team will help you get your station on the map so EV drivers will know your destination chargers are active and ready to be used.

Dedicated to Excellence

Highly Awarded Company

Livingston has been awarded federal and state contracts for EV charging infrastructure and fleet services, along with many other awards for excellence along the way.
